

Seatrans Group has agreed to purchase M/T Oriental Lotus

It is with great pleasure that we welcome the M/T Oriental Lotus to the Seatrans family. The vessel is well known to us, as it has been on time-charter to Seatrans Chemical Tankers since November 2021.

M/T Oriental Lotus is a 14,281 DWT stainless steel chemical carrier with 20 segregations and N2 generator. She was built at Asakawa Shipbuilding Co. Ltd. in 2010. Seatrans will be taking delivery of the vessel in Europe during May 2023 and the vessel will be renamed M/T Trans Tind. With this addition, Seatrans Chemical Tankers is taking important steps to remain long-term committed to our customers serving the route between Northern Europe and the Mediterranean. The purchase of M/T Oriental Lotus, and our two new builds arriving quarter three and four 2023, will lower our fleet age profile and increase flexibility across the fleet.
